DETAILED ACTION

1. Receipt of the amendment filed August 01, 2008 is acknowledged. Claims 1-19 are pending in the application.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over 20030144946) in view of Gutman et al (US 5,221,838)

Misawa discloses self-service terminal comprising: a media acceptor for receiving media items; and a wireless tag reader for reading received media items incorporating wireless tags.

means defining a temporary storage facility incorporating the wireless tag reader.

--defining a second storage facility for receiving the contents of the temporary storage facility when a transaction is accepted by a user.

--means for analyzing a media item.

a method of operating a self-service terminal, the method comprising:

receiving a media item from a user;

--detecting a wireless tag incorporated within the received media item;

--reading data from the detected wireless tag; and

--presenting the read data to the user for acceptance by the user (see Abstract, paragraphs 0004-0019, 0049-0059).

Miswa fails to provide an ATM per se. A definition of an automated teller machine is a machine, activated by a magnetically encoded card or other medium, that can process a variety of transactions (see www.helpwithmybank.gov/dictionary/). Gutman discloses a machine that is activated by a magnetically encoded card or other medium, that can process a variety of transactions that is connected to a bank (or financial institutions) (see Gutman abstract, see column 1, lines 18+; column 3, lines 45+; and column 5, lines 44+).

It would have therefore been obvious for one of ordinary skill in the art to substitute the PDA of Miswa for the electronic wallet or PDA of Gutman, to make electronic transactions, particularly between POS and financial institutions.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
